

Microsoft® Internet Explorer 6 (IE6)

How to Allow Internet Explorer to Work Online

If you lose your Internet connection, Internet Explorer will display a message asking if you want to work offline. If you choose “yes,” the next time you open Internet Explorer and want to connect to the Web, you’ll need to follow these instructions to get online.

1. If this window appears when you open Internet Explorer, select **Connect**.

2. If after following the instruction in Step 1 you can't get online, select **File** from the menu located at the top of your Internet Explorer window. Select **Work Offline** to remove the checkmark adjacent to it. (If it's unchecked, the browser is working online.)
